I have great pleasure in presenting the proceedings of the 10th European Photovoltaic Solar Energy Conference held in Lisbon from 8 to 12 April 1991. These proceedings contain all the scientific papers delivered at the conference. The following is a short summary of the conference activities. The conference was opened by the Minister of Industry and Energy of Portugal, Eng. Luis Mira do Amaral. At the opening ceremony, the Becquerel Prize created by the Commission of the European Communities was awarded to Professor Werner Bloss of the University of Stuttgart and presented by Professor Philippe Bourdeau, Director at the Directorate General for Science Research and Development. The Becquerel Lecture delivered by Professor Bloss constituted the scientific opening to the conference. About 760 delegates from 53 countries presented around 350 contributions, 50 of them as plenary lectures. The contributions were selected among the many papers submitted this time more strictly than ever before. Also, a selected group of scientists were invited to deliver 15 review lectures to provide an adequate context to the contributions to the conference. A symposium on photovoltaics in developing countries, which was very well attended, took place as a parallel event. The symposium provided an opportunity to hear not only experts of the industrialized countries but also speakers from the countries where photovoltaics provides services of paramount value.

Revolving around the interaction between spectrometer and target station design and performance, this volume emphasises the need for feedback that must exist between scientific requirements and source design. It achieves a forum for the sharing of information on the development of spallation neutron sources of great value to researchers in condensed matter physics instrumentation and data processing involved in neutron scattering at pulsed and steady sources.

Annotation Metrics explores the latest studies in software measurement, empirical software engineering, and software quality. It focuses on the practice of software measurement and on the use of data to understand, evaluate, and model software engineering phenomena.

This volume contains papers presented at the 10th International Software Process Workshop.

Low and middle income countries (LMICs) are home to diverse populations of livestock species adapted to various agro-ecological zones, production systems, and harsh environmental conditions. However, the livestock in LMICs have not been systematically improved, and current low levels of productivity do not meet the demand for livestock products by a growing population. Recent advances in next generation sequencing and genotyping technologies have enabled the application of genomic selection in various livestock species in some western countries with great success. Despite the low adoption of genomic breeding in LMICs livestock industry, various studies and programs were initiated, and some are still ongoing. Furthermore, community based breeding programs (CBBPs) have been initiated in many LMICs with great benefits for smallholder livestock farmers. CBBPs are based on the active participation of

farmers from inception through to implementation and consider their needs views decisions breeding objectives and available infrastructure in africa for instance small ruminants cbbps have generated substantial genetic gains and socioeconomic benefits for rural poor farmers however the current challenges affecting the data recording and genetic evaluation of the cbbps in Imics are yet to be fully reported furthermore the cbbps are yet to integrate genomic selection in their breeding strategies for sustainable livestock breeding in Imics there is a need to assess the current status of livestock genomics and community based breeding strategies to identify the challenges and suggest mitigating strategies and future improvement strategy plans in this research topic we aim to collect findings from past and current livestock genomics and community based breeding programs the challenges the lessons learned the opportunities and future perspectives
